Chennai

Summary

Expertise knowledge in developing high-performance, responsive, secure, and scalable web applications using React. Worked on US based Healthcare & Banking and Telecom domains.

Work Experience

Nagarro

Sep 2022 - present
2 years

Associate Staff Engineer

- Built a common Single Page Application template with Azure MSAL authentication which can be used for Frontend React projects in IHS.
- Developed web portal to configure and monitor integrations (data transmission) between source and destination systems using React and Ant Design.
- Built mobile responsive Idea portal through which Ideas can be submitted, tracked & approved systematically using React, NextJS & TailwindCSS.
- Developed Asset Tracking Real Time Dashboard to monitor the locations of Tower sites & batteries and highlight sites that have critical alarms and events using React, SignalR & Redux Toolkit.
- Developed BOQ app consisting of 5 different financial modules which automated Supplier Billing in bilingual (English & Portuguese) using React, TypeScript, React Hook Form and Ant Design

Legato Health Technologies

Dec 2019 - Sep 2022
2.8 years

Senior Software Developer

- Led transition of Individual renewals project from Deloitte to Legato which reduces billing by 66.67% for the parent company Anthem
- Played a crucial role in developing UI using React for renewals for short term plans (Cost Effective plans offered by Anthem in US during COVID)
- Developed UI for Member Migration for manually enrolling the members in ISG system using React, TypeScript & MaterialUI

Bank of NewYork Mellon Technologies

Aug 2017 - Nov 2019
2.5 years

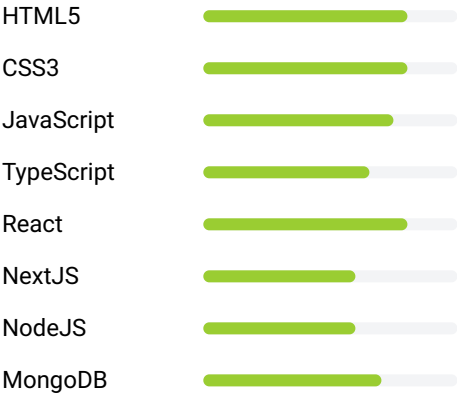

Application Developer

- Worked on Journal Machine Project – Transfer of funds from Funding Account to Trading Account by tracking down journal trade activities and customer balance file
- Developed Alert mail service for long running jobs in spool (> 30 minutes of average elapsed time)

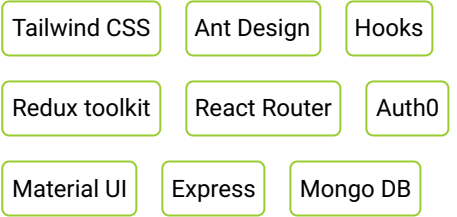

Career Objective

Eager to expand my skill set with cutting-edge technologies. Seeking an opportunity to work in a fast-paced, results-driven agile environment with varied responsibilities.
